CX, UX, product design, and experience strategy leader who makes large organizations use the assets they already own. Sixteen years across telecom, ecommerce, retail, and advertising: turned 2,000 retail stores into same-day delivery infrastructure, moved a national J.D. Power ranking from 9th to 3rd, and built a 20-person design org plus three frameworks a top-five US cable operator still runs on. I find the missing sentence, incentive, or owner, and the number moves.

CORE CAPABILITIES

Product Design Leadership | UX Strategy | Service Design | Journey Orchestration | Design Systems | Human-Centered Design | UX and CX Research | Usability Testing | UX and CX Metrics | Agile Delivery | AI-Augmented Workflows | Cross-Functional Leadership

PROFESSIONAL EXPERIENCE

Cox Communications, Inc. (Now Spectrum)

Director of Customer Experience, User Experience, and Product Design · 2018 to Present

- Moved Cox's national J.D. Power ranking from 9th to 3rd by standing up "Becoming a Customer" as one program with one owner across Product, Sales, Support, Field Operations, and Technology — including four months spent changing field-technician compensation from install speed to include retention. Post-install satisfaction +23%, support calls -18%, 90-day churn -8%.
- Took self-install failures from 30% to 3%, removing roughly 45,000 truck rolls and ~\$7M in operating expense annually.
- Got product, sales, marketing, and care selling one definition of value instead of four across 20+ touchpoints. ~\$217M in new revenue over five years, +34% healthcare conversion, +22% contract value.
- Grew design from an optional in-house agency into the function that owns customer journeys end to end — 4 designers to 20, ~12% better retention across 250K customers — by reframing the work in OpEx, satisfaction, and attach-rate terms, which is what won funding and a seat where roadmaps get set.
- Authored the three frameworks Cox still uses to decide where experience investment goes: Moment Architecture, Experience IQ, and The Trace. Adopted as standard across Product, Marketing, Operations, and Technology.
- Cut a six-week creative production cycle to five days and avoided ~\$1M in contractor spend by encoding eight years of CX methodology into 70+ AI skills. Being adopted as the experience-operations standard for the merged Cox and Charter organization.
- Promoted 3 designers into senior roles, 2 through a leveling framework I built in a flat org. Zero voluntary attrition in eight years.
- Trained thousands of Cox employees in human-centered design, to the point that other departments requested it for their own teams.

Cox Communications, Inc.

Experience Design Strategy Lead · 2015 to 2018

- Cut enterprise churn ~9%, from friction surfaced across six segments in 100+ ethnographic interviews.
- Cut support tickets ~15% by rebuilding both the tools agents use and the portal customers try first.
- Cut development time ~25% with a design system 12 engineers adopted.
- Gave product, support, and sales one shared set of priorities, built from 50+ journey maps and service blueprints.

The Home Depot

UX Information Architect · 2014 to 2015

- Turned 2,000+ stores into same-day delivery infrastructure by building fulfillment visibility into the cart: real-time inventory, delivery-zone logic, dynamic pricing by distance and window. Express reached 8% of orders at 34% higher AOV, +15% conversion, +14 CSAT points — with no new warehouses.
- Lifted mobile conversion ~22% as information architect on cart and checkout for a \$1B GMV platform.
- Raised add-to-cart ~9% by simplifying product and cart interactions.
- Shipped releases ~20% faster by making usability testing routine: 50+ tests, 300+ participants.
- Cut QA time ~20% by giving 40+ designers one reusable pattern set.

The Home Depot

Project Manager · 2013 to 2014

- Delivered ~\$2M of digital work across 8 workstreams, all on time.
- Cut bounce ~13% by restructuring pages with design and engineering.

Moxie USA

Digital Brand Marketing Manager · 2010 to 2013

- Ran multi-channel launch campaigns for Verizon device releases, supporting \$1B+ in launch-period online sales.
- Lifted click-through ~18% with personalized targeting across 50+ campaign variants.
